Pharmaceuticals / PH-03

Warehouse operations with marking codes

Not applying the code, but handling coded goods in the warehouse and in documents without errors, now that fines have begun.

The code is applied. Now it must not be lost.

Since 2026, fines have been applied for violations of digital marking rules: issuing an ESF without using the code is prohibited, and at the till a receipt is issued only after the code is scanned. A tax consultant warns of large fines for minor errors.

Conceptual architecture. No operating results are shown.

01 Receiving	Box code · Check · Batch
02 Storage	Location · Opened box · Remaining stock
03 Shipment	Scanner · ESF with codes · Document
04 Returns	Code · Status · Return to circulation

At a glance

01.01.2026 — Date from which financial penalties for marking rule violations apply. [1]

23.01.2026 — From this date, selling goods by the unit without marking is also a violation. [2]

10.2026 — Integration of marking, e-prescriptions, receipts and ESF announced for reimbursement. [3]

01 Evidence and context

Who it is for

CEO	Penalty risk.
Warehouse	Receiving and shipping.
Accounting	ESF.
IT	Integration.

Facts and global practice

kun.uz

From 1 January 2026, financial penalties apply for marking rule violations; issuing an ESF for marked goods without applying the code is prohibited; in retail, a receipt is issued only after the code is scanned. [1]

kun.uz (tax consultant)

From 23.01.2026, selling goods by the unit without marking is also classified as a violation. [2]

Tax Committee

Under reimbursement, the fiscal receipt shows the e-prescription ID and the marking code; the code is withdrawn from circulation in the «Asl belgisi» system, and compensation is processed via ESF. [3]

This document covers warehouse operations with coded goods, not marking equipment.

02 Where the losses occur

Not checked at receiving

Codes on incoming boxes are not scanned.

When a box is opened

In unit sales, the link between item code and box code is broken.

Manual ESF

Codes are entered into the ESF manually.

Returns

The code of returned goods is not reintroduced into circulation.

How the loss is calculated

Fines	cases per month × fine per case
Rejected ESF	rejected ESFs per month × re-processing hours per document
Unsold goods	uncoded stock (units) × unit price
Inspection	preparation hours per remote audit

Illustrative calculations; establish the baseline, units and rates during the site assessment. Avoid counting the same loss twice.

03 Solution architecture

Code as part of warehouse operations

At receiving, putaway, picking and shipping, the code is confirmed by scanner; the ESF is generated automatically with codes.

01 Receiving

Box code · Check · Batch

02 Storage

Location · Opened box · Remaining stock

03 Shipment

Scanner · ESF with codes · Document

04 Returns

Code · Status · Return to circulation

Modules

WMS + TSD (handheld data terminal): coded receiving and shipping	Scanner-based	Commercially available
ESF with codes	Automatic	Commercially available
Returns and return to circulation	Status	Engineering capability
Marking equipment	Partner	In development

Each module has a readiness status. Third-party results are not a forecast for your site.

04 Implementation and measurement

01 Code audit

Receiving and shipping.

Output: error list.

02 Pilot

One warehouse.

Output: coded operations.

03 Scale-up

All warehouses.

Output: full scope.

04 Subscription

Monthly.

Output: error trend.

What is measured

Code errors	Cases	System
Rejected ESF	Count	EDO
Receiving check	Share scanned	TSD
Returns	Closed with code	System

What is needed to start

- Warehouse manager
- Current code process
- EDO operator
- Test access to 1C

05 Readiness checklist and next step

01 Are codes scanned at receiving?	Yes / No / Unknown
02 Are codes of opened boxes tracked?	Yes / No / Unknown
03 Is the ESF generated automatically with codes?	Yes / No / Unknown
04 Is the number of rejected documents known?	Yes / No / Unknown
05 Is the code of returned goods reintroduced into circulation?	Yes / No / Unknown
06 Is a report available for remote audits?	Yes / No / Unknown
07 Are codes linked to batches?	Yes / No / Unknown
08 Are staff trained?	Yes / No / Unknown
09 Are penalty statistics available?	Yes / No / Unknown
10 Is a responsible person assigned?	Yes / No / Unknown

What we do not promise

• Exact timeline and price without an audit

• GMP/GDP certificate or inspection outcome

• Approving validation documentation ourselves

• Unmeasured result

Code audit

We review warehouse operations for coded goods and show where errors arise.

• Break-point map

• Pilot plan

• Implementation fee and monthly subscription

Scope, price and schedule are agreed after reviewing the site and its data.
