Water and beverages / WB-10

Export batches and codes

Managing codes, buyer labels and documents for export batches in a single process.

Exports are growing. Requirements come from both sides.

Carbonated soft drink exports rose sharply in early 2026, mainly to Kazakhstan and Kyrgyzstan. At the same time, buyers are setting their own requirements, and mutual recognition of codes is being introduced.

Conceptual architecture. No operating results are shown.

01 Order	Buyer requirements · Destination · Batch card
02 Production	Codes · Buyer label · Linking
03 Warehouse	Separate pallets · SSCC · Dedicated area
04 Shipping	Document set · Code list · Border

At a glance

43.2 million l — Carbonated soft drink exports in January–February 2026: USD 19.9 million, to 19 countries. [1]

2.9× — Growth in export volume compared with the same period last year. [1]

01.06.2026 — Start date for mutual recognition of water and beverage codes with partner countries. [2]

November 2026

01 Evidence and context

Who it is for

Export department	Buyer requirements and documents.
Production	Labels and codes for the export batch.
Warehouse	Separate handling of export pallets.
Plant owner	New markets and orders.

Facts and global practice

National Statistics Committee

In January–February 2026, 43.2 million litres of carbonated soft drinks were exported, worth USD 19.9 million; volume increased 2.9-fold. [1]

National Statistics Committee

Main destinations: Kazakhstan 26.8 million l, Kyrgyzstan 12.9 million l, Russia 3 million l. [1]

Cabinet of Ministers Resolution No. 56 of 11.02.2026

From 1 June 2026, mutual recognition of water and beverage codes between Uzbekistan and partner countries will be introduced. [2]

Same resolution

Marking data must be stored and processed only in data centres located in Uzbekistan. [2]

Juice and beverage producer, no figures provided

Foreign buyers require their own label on top of Uzbekistan codes; some customers have started cancelling orders. [3]

Mutual recognition may apply only to products subject to mandatory marking in both countries. Check the requirements for each destination separately.

02 Where the losses occur

Two labels

If a buyer requires its own label, it must be determined how that label is linked to the Uzbekistan code.

Batch segregation

If export pallets are mixed with domestic-market pallets, codes may end up in the wrong market.

Document set

Codes, pallet labels and shipping documents must match each other.

Changing requirements

The mutual recognition procedure is new; practical requirements may differ by destination.

How the loss is calculated

Cancelled order	order volume (units) × margin per unit
Relabelling	units × (relabelling time per unit × labour cost per hour + label material cost per unit)
Delayed shipment	waiting days × cost per day
Wrong market	misdirected units × return cost per unit

Illustrative calculations; establish the baseline, units and rates during the site assessment. Avoid counting the same loss twice.

Separate code flow for exports

The export batch is tracked with a separate flag from order to shipment, and buyer requirements are recorded on the batch card.

01 Order

Buyer requirements · Destination · Batch card

02 Production

Codes · Buyer label · Linking

03 Warehouse

Separate pallets · SSCC · Dedicated area

04 Shipping

Document set · Code list · Border

Modules

Code flow for export batches	Batch card, buyer requirements, code linking	Engineering capability
Warehouse and handheld data terminals (WMS)	Separate handling and shipping of export pallets	Commercially available
Asl Belgisi and 1C integration	Exported codes and documents	Commercially available

Each module has a readiness status. Third-party results are not a forecast for your site.

04 Implementation and measurement

01 Requirements map

Requirements for each destination and buyer are collected.

Output: requirements table.

02 Batch process

The batch card and linking rules are designed.

Output: export process description.

03 Pilot batch

The process is tested on one destination.

Output: documents complete.

04 Scale-up

Remaining destinations are added.

Output: monthly report.

What is measured

Document readiness	Share of batches fully ready before shipment	Batch card
Relabelling	Relabelled units	Production
Batch preparation time	Days from order to shipment	Batch card
Buyer complaints	Number, by cause	Export department

What is needed to start

- Person responsible for exports
- List of destinations and buyers
- Buyer requirement documents
- Test access to the warehouse system and 1C

05 Readiness checklist and next step

01 Are code and label requirements recorded for each destination?	Yes / No / Unknown
02 Has it been determined how the buyer label is linked to the Uzbekistan code?	Yes / No / Unknown
03 Is each export batch tracked with a separate batch card?	Yes / No / Unknown
04 Are export pallets stored separately in the warehouse?	Yes / No / Unknown
05 Are export pallets labelled with an SSCC?	Yes / No / Unknown
06 Is the code list attached to the documents at shipment?	Yes / No / Unknown
07 Has information on the mutual recognition procedure been obtained?	Yes / No / Unknown
08 Are relabelling cases recorded?	Yes / No / Unknown
09 Are buyer complaints recorded with their cause?	Yes / No / Unknown
10 Is there a person responsible for exports?	Yes / No / Unknown

What we do not promise

- Exact timeline and price without an audit
- Government resolutions and deadlines
- Changes to line software without the equipment supplier's permission
- Unmeasured results or savings
- Legal opinion on foreign country requirements
- Order volumes

Export process audit

We collect the requirements for your export destinations and design the batch process.

- Requirements table
- Batch process description
- Pilot batch plan

Scope, price and schedule are agreed after reviewing the site and its data.
